

Visio conférence *Mardi 23 janvier 2024* – 14h à 15h

“Using synchrotron light for biomedical research”

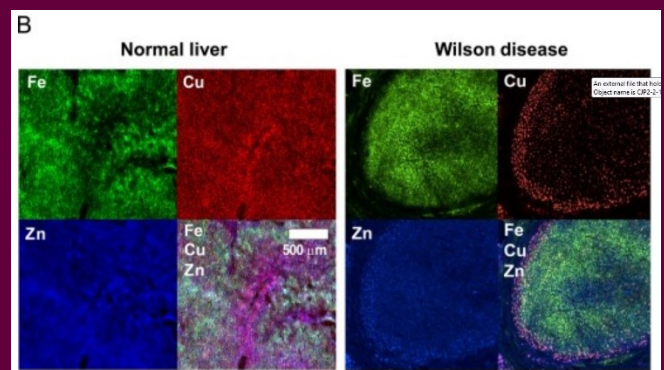

Slavka KASCAKOVA, Maître de Conférences

Université Paris-Saclay, INSERM UMR-S 1193
Physiopathogénèse et Traitement des Maladies du Foie

Slavka Kascakova is currently an Assistant Professor at the Faculty of Medicine of University of Paris-Saclay, France, and works as a senior researcher at the Centre HepatoBiliaire of Paul Brousse hospital in Villejuif.

Her research focuses on using synchrotron multimodal spectroscopic approaches for the diagnosis of liver diseases, the liver transplantation and the development of therapeutic strategies against fulminant hepatitis and primary liver cancers.

Rapid and reliable diagnosis of Wilson disease using X-ray fluorescence. [J Pathol Clin Res.](#) 2016 Jul; 2(3): 175–186.
